

Indeed用にXMLファイルをフォーマットする方法

- HTMLはdescriptionタグのCDATAの一部として送信する必要があります
- HTMLのエスケープエンティティには対応しておりません。例:<の代わりに<を使用してください
- 対応しているタグ:
 - 太文字
 - 区切り

 - 段落 <p>
 - 順序なしリスト項目
 - リスト項目
 - 強調
 - ストレス強調（斜体）
- 箇条書きを含めるには、順序なしリスト項目を使用してください
- 注：段落間には空白行が自動的に挿入されます

Descriptionにテキストベースの書式設定を使用するヒント

1. **太文字のヘッダー**
 - 62文字未満のコロンで終了する行、太字の見出しとなります (http:もしくはhttps:を除く)
2. **箇条書き**
 - ダッシュ: "-"
 - アスタリスク: "*"
 - 見出し黒丸 "●"
3. **改行**
 - 実際の改行を使用 (Enter、テキストベースの場合
は使用不可)
 - 改行のないXMLを提供されますと、ひとつながりの文字の羅列として表示されるため、修正をお願いすることになります

HTMLフォーマットのXMLとIndeed上での実際の見え方の例

Example

```
<description><![CDATA[<p><strong>Senior Software Engineer</strong></p>
<br>
<p>Your Really Cool Company is looking for talented engineers to help set-up our Austin-based
engineering team. Our SecurityIQ product helps organizations identify and protect sensitive data from
both internal and external threats. </p>
<br>
<p>As part of our team, you will enjoy the double advantage of working in a well-established company
with a large customer base, while experiencing the excitement of an early-stage startup. </p>
<br>
<p>We are now seeking a Senior Software Engineer to help us build our Austin branch of the
Performance & Sustaining Engineering team from scratch.</p>
<br>
<p>You will be in charge of working with our support teams to solve our customers' most complex
problems, which may include code issues, database issues, performance bottlenecks, and external
systems that have gone rogue. You'll get a chance to work with state-of-the-art data analytics
infrastructure such as Elasticsearch and Lucene, gathering and analyzing data from some of the world's
largest organizations. You will be taking an active role in the development of our core platform, since the
knowledge you acquire during the sustaining process will be invaluable. </p>
<br>
<p>If you are intrigued by puzzles and problem-solving, relish complex challenges, and love think outside
the box and come up with creative solutions - you definitely belong on our team! </p>
<br>
<p><b>Required experience:</b></p>
<br>
<ul>
<li>At least five (5) years of experience working in C#</li>
<li>At least two (2) years of experience working with SQL queries and stored procedures </li>
<li>Proven experience with Microsoft IT infrastructure – Active Directory, Windows File Servers, NTFS,
Exchange, and SharePoint </li>
<li>C# performance analysis and troubleshooting of high CPU and memory consumption – a

Senior Software Engineer

Your Really Cool Company is looking for talented engineers to help set-up our Austin-based engineering team. Our SecurityIQ product helps organizations identify and protect sensitive data from both internal and external threats.

As part of our team, you will enjoy the double advantage of working in a well-established company with a large customer base, while experiencing the excitement of an early-stage startup.

We are now seeking a Senior Software Engineer to help us build our Austin branch of the Performance & Sustaining Engineering team from scratch.

You will be in charge of working with our support teams to solve our customers' most complex problems, which may include code issues, database issues, performance bottlenecks, and external systems that have gone rogue. You'll get a chance to work with state-of-the-art data analytics infrastructure such as Elasticsearch and Lucene, gathering and analyzing data from some of the world's largest organizations. You will be taking an active role in the development of our core platform, since the knowledge you acquire during the sustaining process will be invaluable.

If you are intrigued by puzzles and problem-solving, relish complex challenges, and love think outside the box and come up with creative solutions - you definitely belong on our team!

Required experience:

- At least five (5) years of experience working in C#
- At least two (2) years of experience working with SQL queries and stored procedures
- Proven experience with Microsoft IT infrastructure – Active Directory, Windows File Servers, NTFS, Exchange, and SharePoint
- C# performance analysis and troubleshooting of high CPU and memory consumption – a *big* plus
